PROJECTS

Let's Eat   April 2023

An app that decides which restaurant you and friends will eat at based on location and set preferences

- Really dived into Flutter/Dart as well as Firebase and a Yelp! API
- A 3 week final project for Holberton with me and a partner to demonstrate all skills learned
- I worked on the front end and helped with backend and merging of code
- https://github.com/CameronCrupper/Lets_Eat

Hack Sprint Blossom Video Game   April, 2022

A 5 day quick design of whatever we wanted

- Learned PyGame
- A 5 day quick design of whatever we could design
- I was the UX/UI designer, the graphical creator, and programmed with a partner
- https://github.com/CameronCrupper/HackSprintBlossom

"Wave" Website Design Challenge   August 2022

Create a custom frontend website from scratch

- Build a 1-3 page website for the product I believed they were selling based on their prompt
- Website had to be locally hosted
- Used different frameworks we were taught for the frontend
- https://github.com/CameronCrupper/waves-website
